Contents Volume 206 (1998/99)

Citrus root responses to localized drying soil: A new approach to studying mycorrhizal effects on the roots of mature trees
J.F. Espeleta, D.M. Eissenstat and J.H. Graham **1–10**

Effects of nitrogen fertilization of grapefruit trees on soil acidification and nutrient availability in a Riviera fine sand
Z.L. He, A.K. Alva, D.V. Calvert, Y.C. Li and D.J. Banks **11–19**

The role of mineral nutrients in the increased growth response of tomato plants in solarized soil
J.M. Grünzweig, J. Katan, Y. Ben-Tal and H.D. Rabinowitch **21–27**

Effect of burning of tropical deciduous forest soil in Mexico on the microbial degradation of organic matter
F. García-Oliva, R.L. Sanford Jr. and E. Kelly **29–36**

Root and shoot elongation of rhizotron-grown seedlings of *Eucalyptus nitens* and *Eucalyptus globulus* in relation to temperature
R.K. Misra **37–46**

Influence of large termitaria on soil characteristics, soil water regime, and tree leaf shedding pattern in a West African savanna
S. Konaté, X. Le Roux, D. Tessier and M. Lepage **47–60**

The root zone dynamics of water uptake by a mature apple tree
S. Green and B. Clothier **61–77**

Growth behaviour of *Azolla pinnata* at various salinity levels and induction of high salt tolerance
V. Rai and A.K. Rai **79–84**

Below-ground respiratory responses of sugar maple and red maple saplings to atmospheric CO_2 enrichment and elevated air temperature
N.T. Edwards and R.J. Norby **85–97**

The effects of liming and gypsum applications on a sessile oak (*Quercus petraea* (M.) Liebl.) stand at La Croix-Scaille (French Ardennes) I. Site characteristics, soil chemistry and aerial biomass
M.R. Bakker, C. Nys and J-F. Picard **99–108**

The effect of lime and gypsum applications on a sessile oak (*Quercus petraea* (M.) Liebl.) stand at La Croix-Scaille (French Ardennes) II. Fine root dynamics
M.R. Bakker **109–121**

Root distribution and water uptake patterns of corn under surface and subsurface drip irrigation
E.F. Coelho and D. Or **123–136**

Short-term immobilisation and crop uptake of fertiliser nitrogen applied to winter wheat: effect of date of application in spring
S. Recous and J-M. Machet **137–149**

Fatty acid methyl ester (FAME) profiles as a tool to investigate community structure of two agricultural soils
A.M. Ibekwe and A.C. Kennedy **151–161**

Genotypic variation for phosphorus uptake from hardly soluble iron-phosphate in groundnut (*Arachis hypogaea* L.)
M. Wissuwa and N. Ae **163–171**

Determination of inorganic phosphate in a soil extract using a cobalt electrode
S.O. Engblom **173–179**

Fractal geometry of root systems: Field observations of contrasting genotypes of common bean (*Phaseolus vulgaris* L.) grown under different phosphorus regimes
K.L. Nielsen, C.R. Miller, D. Beck and J.P. Lynch **181–190**

Mycorrhizas and C and N transformations in the rhizospheres of *Pinus sylvestris*, *Picea abies* and *Betula pendula* seedlings
O. Priha, T. Lehto and A. Smolander **191–204**

Technical approaches to inoculate micropropagated sugar cane plants were *Acetobacter diazotrophicus*
V.M. Reis, F.L. Olivares, A.L.M. de Oliveira, F. Bueno dos Reis Jr., J.I. Baldani and J. Döbereiner **205–211**

Effect of biotite, zeolite, heavy clay, bentonite and apatite on the uptake of radiocesium by grass from peat soil
A. Paasikallio **213–222**

Drought tolerance of apple rootstocks: Production and partitioning of dry matter
C.J. Atkinson, M. Policarpo, A.D. Webster and A.M. Kuden **223–235**

Characterization of leaf boron injury in salt-stressed *Eucalyptus* by image analysis
J.A. Poss, S.R. Grattan, C.M. Grieve and M.C. Shannon **237–245**

Volume contents **247–248**

Author index **249**

Instructions for authors **251–253**
